**Semester 1** **Thrust area: Inspiration, Motivation & Ideation**

**Quarter 2**

| | |
|---|---|
| **Theme** | Ice-Breaker – Logic, Fun & Strategy |
| **Activity Name** | BrainDrain : Where Logic meets Chaos |
| **Mode of Conduct** | Offline |
| **Level of Activity** | Level 3 |
| **Participants** *(Online / offline)* | **Participants (Online / Offline):** Participants: First-year students of 2025–26 batch (individuals & teams)<br>• **Format**: Offline, multiple rounds with logical + coding challenges |
| **Description** | On 17th November 2025, IEEE Computer Society S.P.I.T. organized *Brain Drain*, an ice-breaker event for the latest first years. The event was conducted to introduce first-year students to the IEEE C.S community and encourage participation through interactive activities.<br><br>Participants competed individually or in teams across multiple rounds consisting of riddles, logic-based questions, and coding-inspired tasks. The focus was on analytical thinking and problem-solving rather than advanced programming knowledge, making the event accessible to all freshers. Each round included variations in rules to assess adaptability and attention to detail.<br><br>In the final round, a random leaderboard position (36) was selected, and the participant at that position received a special prize irrespective of their overall score. Participants at the lower end of the leaderboard were given light-hearted tasks as part of the closing segment.<br><br>The event was conducted successfully and achieved its objective of engaging first-year students in a structured and interactive manner.<br><br>Impact & Learning Highlights: |

- Breaking the Ice: Turned strangers into teammates and teammates into friends.
- Creative Thinking: Pushed participants to think beyond rules and logic.
- Adaptability Under Chaos: Prepared students to handle surprises with confidence.
- Fun Above All: Ensured everyone left smiling whether they won, lost, or got creatively punished.
