From the Principal's Desk

I have great pleasure in expressing my thoughts as the Principal of Sardar Patel Institute of Technology (SPIT), the Numero Uno, self-financed, autonomous Institution of Maharashtra. We are a constituent of Bharatiya Vidya Bhavan, not just a conglomeration of more than 300 institutions, but a culture, a saga, a holy journey, started by Dr. K.M. Munshi with the support of Mahatma Gandhi in 1938. Imparting value-based education with Indian cultural ethos has always been the motto of Bhavan.

Engineers & technologists form the backbone of any nation's economic development. The world is presently undergoing a very unprecedented, extraordinary, challenging time. A new normal is anticipated in many walks of life, including education. Such disruptions will come again and again in one or the other form. Engineers will work for 40-50 years of their life, they will have 3 to 4 diversified careers in technologies we are even unaware of. To make aspiring minds confident and future-proof, education must prepare them for a "marathon" rather than a "sprint". SPIT makes continuous, sincere efforts towards this.

We focus on "How to learn?" rather than "What to learn?". We believe in multidisciplinary exposure to the learners, yet ensuring growth in one vertical, cherishing human sensitivity and empathy. We have thoughtfully articulated a unique academic model towards this. Our splendid academic performance, sparkling placements (quantitative and qualitative), enrollment for higher studies at the best places of the world, prizes won by our students in national/international level technical competitions, in the past many years are the true testimonials for this.

With the support of a dedicated and hardworking faculty and staff, the institute has achieved enviable visibility and ranking in a short span. On behalf of all stakeholders of SPIT, I welcome you to this family and look forward to your valuable association with us for a better tomorrow. Four years of engineering education at Sardar Patel Institute of Technology or two years post-graduation, will undoubtedly empower you to lead a successful life.

Let's grow together…

Dr. Bhalchandra Chaudhari
Principal,
Bharatiya Vidya Bhavan's Sardar Patel Institute of Technology

From the HOD's Desk

Dear Students,

I would like to extend my warmest welcome to the Department of Computer Science and Engineering.

Established in 2021, the Department of Computer Science and Engineering introduced two undergraduate programs—B.Tech in CSE (AIML) and B.Tech in CSE (Data Science)—to equip students with the skills required to excel in the rapidly evolving technology landscape. From 2023 onwards, these programs were merged into a unified B.Tech in CSE program. Currently, the Department offers one undergraduate program, B.Tech in CSE, one postgraduate program, MCA, and a Ph.D. program in MCA.

We take pride in nurturing future innovators, researchers, and technology leaders through excellence in education, research, and innovation. Our academic programs, aligned with the **National Education Policy (NEP-2020)**, offer a unique blend of teaching, **research, activity-based learning, multidisciplinary minors, six-month industry/research internship, and Honors programs** to foster critical thinking and problem-solving skills.

The curriculum provides domain expertise through electives, interdisciplinary exposure through the **Multidisciplinary Minor (MDM) program**, and **industry-relevant skills** through collaborations and value-added courses.To support emerging technologies and advanced research, the Department has strengthened its infrastructure with **GPU-enabled computing facilities**, creating new opportunities for innovation, learning, and research.

All faculty members of the Department of Computer Science and Engineering are deeply committed to supporting your academic journey and overall success. In return, we encourage you to work diligently, value diverse perspectives, and actively contribute to society.

We are confident that our students will emerge as valuable assets not only to this institution but also to society and the nation at large.I wish you all the very best for a successful and rewarding career ahead.

Warm regards,

Dhananjay Kalbande
Head of the Department
Computer Science Engineering,
Bharatiya Vidya Bhavan's Sardar Patel Institute of Technology
www.drkalbande.in, https://cse.spit.ac.in/#/faculty/dr-dhananjay-kalbande

From the Associate HOD's Desk

Dear Students, Faculty Members, Alumni, and Readers,

It is my pleasure to welcome you to this edition of our Department Magazine. More than just a collection of achievements and events, this magazine reflects the enthusiasm, creativity, and innovation that define the Department of Computer Science and Engineering at Sardar Patel Institute of Technology.

Over the years, our department has grown from offering a strong foundation in computer science to becoming a centre for learning and innovation in emerging technologies such as Artificial Intelligence, Machine Learning, Data Science, and Cybersecurity. This journey has been possible because of the dedication of our faculty, the curiosity of our students, and the unwavering support of our institution. I sincerely appreciate the hard work and commitment of everyone who contributes to making our department a place of excellence.

Technology is evolving faster than ever, and success in this field belongs to those who never stop learning. I encourage every student to stay curious, ask questions, explore new ideas, and make the most of every opportunity. Participate in projects, research, hackathons, technical competitions, internships, and extracurricular activities. These experiences not only strengthen your technical knowledge but also help you develop confidence, teamwork, and leadership skills.

At CSE, we are committed to providing an environment that nurtures innovation and lifelong learning. With modern laboratories, advanced computing facilities, and the guidance of dedicated faculty members, we strive to bridge the gap between classroom learning and real-world challenges. Along with technical expertise, always remember the importance of integrity, discipline, collaboration, and empathy—qualities that define successful professionals and responsible citizens.

As you read through this magazine, I hope you take pride in the remarkable accomplishments of our students and faculty. Let these stories inspire you to dream bigger, work harder, and contribute meaningfully to society through technology.

I wish you all a successful academic year filled with learning, innovation, and new opportunities.

Happy Reading!

Warm Regards,

Dr. Renuka Pawar
Associate Head of the Department
Department of Computer Science and Engineering
Sardar Patel Institute of Technology (S.P.I.T.)

From the Class Advisor's Desk

Dear Students,

Welcome to the Faculty Advisor Desk!

"Success is when your signature becomes an autograph."

- Dr. A.P.J. Abdul Kalam

At S.P.I.T., we believe that education is more than academics—it's about nurturing curiosity, building character, and inspiring vision. As your faculty advisors, we are committed to supporting your journey through the challenges and opportunities of academic life.

From navigating your coursework and exploring interdisciplinary paths to planning your career and overcoming personal obstacles, we are here as your partners and mentors. Our aim is to empower you to transform aspirations into achievements.

Remember, you are not walking this path alone. Whether you need advice, a listening ear, or strategic direction, our door is always open. Together, let's shape a future that reflects your highest potential.

Reach out. Engage. Grow.
We are here to help you thrive.

Best wishes,

Prof. Aparna Halbe, Prof. Sheetal Chaudhari & Prof. Varsha Hole
Class Advisors,
Bharatiya Vidya Bhavan's Sardar Patel Institute of Technology

From the Editor's Desk

Dear Readers,

Welcome to the 2025-2026 edition of the Computer Science Engineering Departmental Magazine! As we step into another exciting year, I am delighted to present this collection of insights, innovations, and inspirations that showcase the brilliance of our department.

The world of technology is evolving at an unprecedented pace, and our department remains at the forefront of this transformation. This year's magazine highlights groundbreaking research in quantum computing, generative AI, and sustainable tech, alongside student-led projects that demonstrate creativity and problem-solving prowess. From ethical discussions on AI governance to hands-on explorations of edge computing and IoT, these pages capture the dynamism of our field.

What truly sets our community apart is the relentless curiosity and collaborative spirit of our students, faculty, and staff. Whether it's winning hackathons, publishing pioneering papers, or mentoring the next generation of engineers, their achievements inspire us all.

As we embrace the challenges of a rapidly digitizing world, let us continue to innovate with responsibility—leveraging technology not just for progress, but for inclusivity, sustainability, and global impact.

A heartfelt thank you to every contributor—writers, designers, photographers, and reviewers—who poured their effort into this edition. Your dedication has brought this magazine to life.

I hope you find this edition as engaging and thought-provoking as we found it rewarding to create. Here's to another year of pushing boundaries and shaping the future!

I thank our beloved leadership - Head, Associate Head, Dean, and Principal for this opportunity.

Warm regards,

Pranav A. Nerurkar
Editor-in-Chief
Computer Science Engineering Departmental Magazine
Bharatiya Vidya Bhavan's Sardar Patel Institute of Technology

From the Student Editors

Every batch leaves behind more than achievements. It leaves behind ideas, friendships, traditions, and stories that become a part of our department's legacy. This magazine captures a few of those moments while making room for many more that are yet to be written.

Every article and photograph in this edition reflects the passion, creativity, and spirit of our CSE community. Together, they tell the story of a year filled with learning, collaboration, and experiences that have shaped us in more ways than one.

May this edition remind you of the moments you've cherished, inspire you to embrace new opportunities, and encourage you to create memories that will one day become part of our department's story.

Warm Regards,

Devika Bongarde
Student Editor
CSE Batch 2028

College is made up of countless little moments that often go unnoticed until we look back at them. This magazine is a reflection of those moments, the memories we created, the milestones we celebrated, and the journey we shared as a CSE family.

Within these pages are stories of curiosity, creativity, friendship, and growth. They remind us that every event we participated in, every challenge we overcame, and every experience we shared has become a part of our collective journey.

As you turn these pages, I hope they bring a smile to your face, spark a sense of nostalgia, and remind you that some of the best stories are the ones we lived together. I hope these pages remain a keepsake for years to come.

Warm Regards,

Mugdha Kangane
Student Editor
CSE Batch 2028

Meet The Team

Krishika Jalali (Chairperson)

Leading ACSES in 2025–26 reinforced an important lesson: meaningful progress is rarely the result of individual effort. It emerges from shared ownership, mutual trust, and a collective willingness to take initiative.

Throughout this tenure, our focus was on creating opportunities for students to learn beyond the classroom, collaborate across interests, and develop the confidence to turn ideas into action. More than the outcomes themselves, I value the culture of responsibility, curiosity, and teamwork that our committee continuously strived to uphold.

I am sincerely grateful to our faculty for their guidance, to every committee member for their commitment, and to the student community for their participation and trust. It has been a privilege to serve, contribute, and grow alongside such dedicated individuals. As ACSES moves forward, I am confident that its greatest strength will continue to be the people who shape it.

Darshan Yadav (Vice Chairperson)

Stepping into the role of Vice Chairperson for ACSES in 2025–26 taught me that leadership is not about standing at the front, but about standing beside those you work with. True progress, I learned, comes from shared ownership, mutual trust, and the collective courage to turn vision into action.

This year, our focus remained on creating spaces where students could learn beyond classrooms, collaborate across disciplines, and find the confidence to lead initiatives of their own. More than the events we hosted or the projects we completed, I cherish the culture of responsibility, curiosity, and teamwork that our committee nurtured together.

I am deeply grateful to our faculty for their constant guidance, to my fellow committee members for their dedication, and to the student community for their trust and enthusiasm. Serving ACSES has been a privilege, and I am certain that its greatest strength will always be the people who continue to shape it.

Events Conducted

1. CODEX – October Edition

Codex Event banner

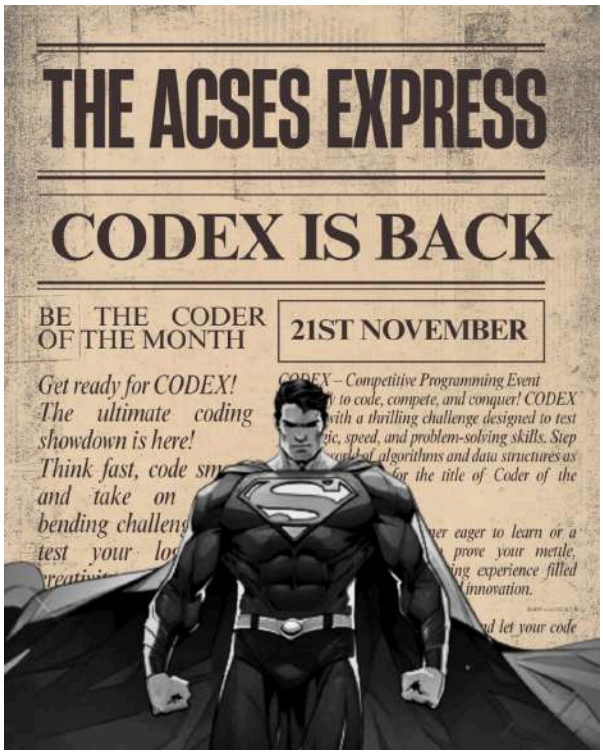

The October edition of CODEX, ACSES's flagship monthly competitive coding event, was successfully conducted to strengthen problem-solving and programming skills among Computer Science Engineering (CSE) and MCA students. The competition provided participants with a platform to apply algorithmic thinking and coding expertise in a challenging yet engaging environment.

To encourage maximum participation, the event was conducted free of cost. The competition witnessed an overwhelming response, with more than **70 students participating actively**. The successful execution of the event reaffirmed ACSES's commitment to fostering technical excellence and building a strong competitive programming culture within the department.

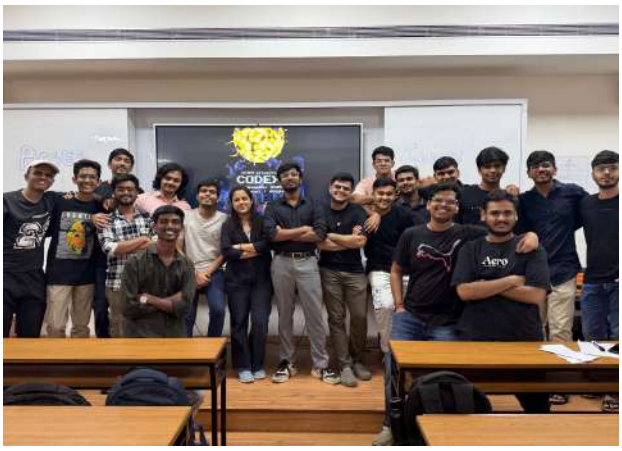

2.CODEX – November Edition

The November edition of CODEX was organized by ACSES on 21 November 2025 from 6:00 PM to 8:00 PM on the 4th Floor campus premises. Continuing the tradition of monthly coding competitions, the event focused on enhancing analytical thinking, algorithmic problem-solving, and programming proficiency among CSE and MCA students.

The event was open to all participants free of charge, promoting inclusivity and accessibility. Around 25 students actively participated and competed in solving coding challenges under time constraints. The event successfully provided students with an opportunity to sharpen their technical skills while engaging in healthy competition.

3. CODEX – January Edition

The January edition of CODEX was conducted on 27 January 2026 from 6:00 PM to 8:00 PM. Organized by ACSES, the event continued its mission of promoting competitive programming and cultivating strong problem-solving abilities among students.

The coding contest attracted approximately 30 participants, who demonstrated their programming expertise through a series of challenging problems. By providing a consistent platform for practice and learning, CODEX continues to play a vital role in nurturing technical excellence and encouraging continuous skill development among aspiring software engineers.

4. BIT TO BID

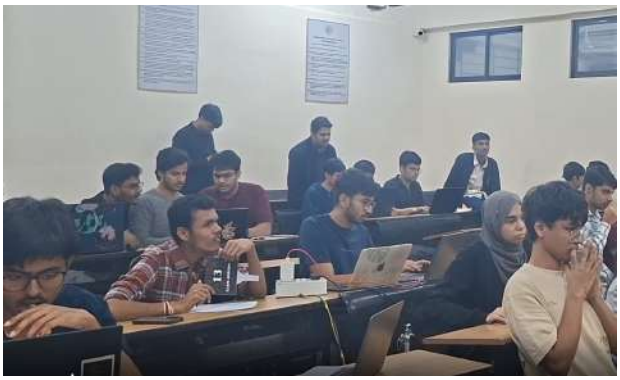

Bit to Bid was a unique competitive programming and strategy-based event organized by ACSES on 9 February 2026, from 6:30 PM to 8:45 PM at Sardar Patel Institute of Technology.

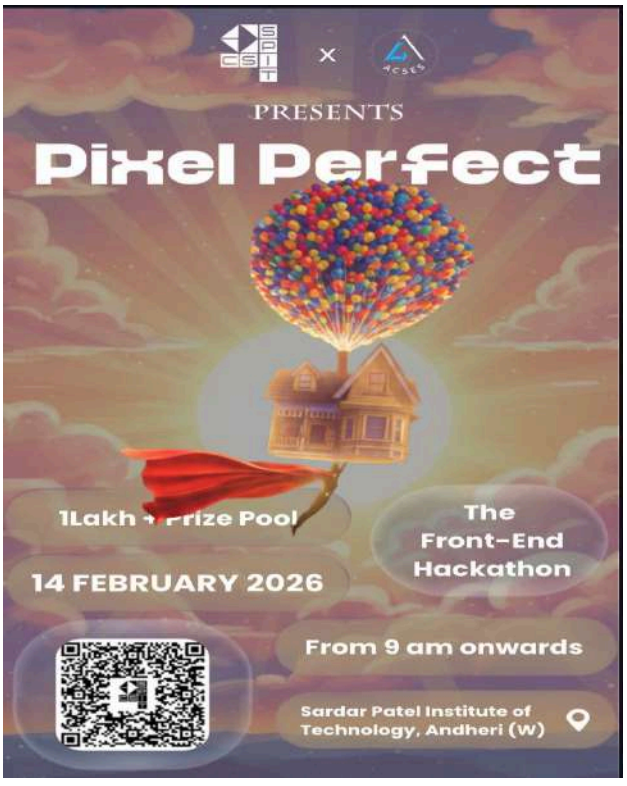

The event introduced an innovative format that combined technical problem-solving with auction-based strategic decision-making. Participants first competed in a coding round and then advanced to a live bidding round, where analytical thinking, teamwork, and resource management skills were tested.

With participation from more than 77 students, Bit to Bid received an enthusiastic response and successfully created a learning environment that blended programming expertise with strategic thinking. The event highlighted ACSES's dedication to designing innovative experiences that go beyond conventional coding competitions.

5. PIXEL PERFECT

ACSES SPIT, in collaboration with CSI-SPIT, successfully organized Pixel Perfect, a frontend-focused hackathon aimed at enhancing practical UI/UX design and frontend development skills among undergraduate engineering students.

The event was conducted on 14 February 2026, from 7:00 AM to 9:00 PM, at Sardar Patel Institute of Technology. Students from multiple colleges participated enthusiastically, showcasing their creativity, design thinking, and frontend development expertise.

The hackathon encouraged participants to develop innovative user-centric web interfaces while applying modern frontend technologies and design principles. Pixel Perfect served as an excellent platform for learning, collaboration, and innovation, further strengthening the frontend development ecosystem within the student community.

6. ACSES Felicitation Ceremony

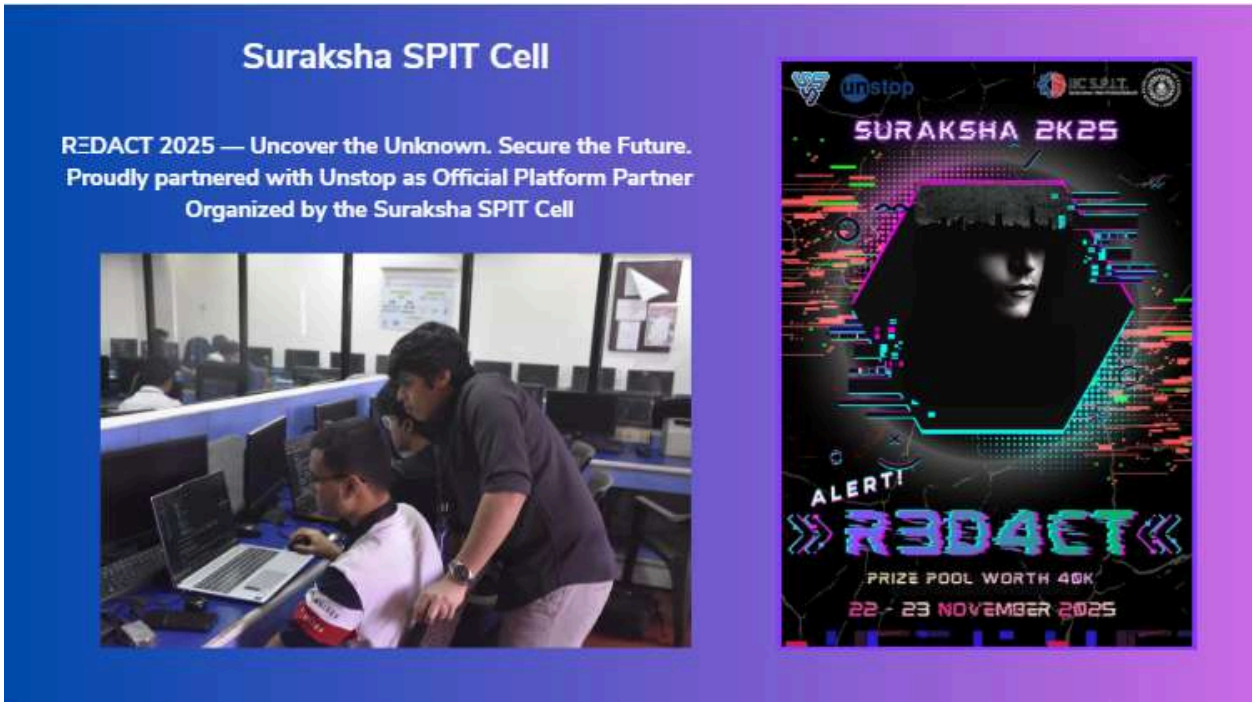

The ACSES Felicitation Ceremony was organized to recognize and celebrate the dedication, leadership, and contributions of committee members throughout the academic year. The event served as a platform to appreciate the collective efforts of students who worked tirelessly towards the successful execution of various technical, cultural, and community-driven initiatives under ACSES.

The ceremony was graced by Dr. Dhananjay Kalbande, Head of the Department of Computer Science and Engineering, along with faculty mentors and esteemed faculty members from various departments. Committee members were felicitated for their commitment, teamwork, and valuable contributions in strengthening the ACSES community and fostering a culture of innovation and collaboration.

The event reflected the department's appreciation for student leadership and highlighted the importance of teamwork, dedication, and service. It concluded with words of encouragement from the faculty, inspiring students to continue striving for excellence and creating meaningful impact within the institution.

Parent Teachers Meeting (PTM)

"A child learns best when parents and teachers work hand in hand toward the same goal."

A Parent–Teacher Meeting (PTM) is a valuable opportunity for parents and teachers to come together and discuss a student's progress, achievements, challenges, and overall well-being. These meetings help build a strong connection between home and College, allowing both parents and teachers to better understand and support the student's growth.

At our institution, we conduct two PTM meetings every academic year—one in each semester. These meetings provide a platform for open communication, encourage collaboration, and ensure that parents and teachers work together to help students reach their full potential.For this Academic year following were the dates and discussed point

Master of Computer Applications Department

Introduction

Master of Computer Applications(MCA) is a **full time two year interdisciplinary Post Graduate Programme** designed to meet the demand of manpower in the field of computer application/Technology in Industry or Organization with an intake of 60 seats.

About the Programme

MCA is a 2 years programme with 6 months Internships.

Internships

Maximum stipend received by our students for internship is 60,000/month. 100% placement every year for MCA students in renowned companies.

Internship opportunities

Research Publications

S.P.I.T. provides a reimbursement of up to Rs. 5000 to students to encourage them for paper publication.

Research opportunities

Patent

The Institute provides guidance and financial support for filing patents for the students and converting them into business models or products. Many MCA students have patents in their name.

Patent filing support

Curriculum and Syllabus

MCA Programme curriculum has all the latest technologies and emerging areas which is taught to students such as Artificial

Intelligence, Machine Learning, Deep Learning, Blockchain etc,

Project Based learning has given students more exposure to real time problems and provides solutions for the same.

Design thinking lab and Entrepreneur lab will help students to enhance their way of thought process and their perspective.

PhD Center

MCA Programme also is the PhD Centre with approved supervisors.

About the Department

Faculty

MCA at S.P.I.T. has highly qualified and skilled faculties who are always ready to help students in every situation.

Mentor–Mentee collaboration

Mentors are allocated to every student to seek any guidance or help they require.

Lab Facilities

MCA Department has well equipped labs with high configuration machines to give students the best experience. The labs are available 24*7 to students for research and projects.

Smart Classroom

The institute has a smart classroom for engaging students in a more interactive manner.

Alumni involvement

The Department has a strong alumni connection which helps the students to get to know about the current requirement and skills needed for good placement. Support and Experience sharing by the Alumni through mentoring and providing networking opportunities.

Technology Business Incubator

Students get the opportunity to work with SPIT-TBI which is an incubation centre that supports daring Entrepreneurs and helps them in building great Technology Ventures of the future.

The SP-TBI building

Hackathon

Students get help and guidance from the institute for participating in national level events like Hackathon.

Internship Completion Letter

Admission No.- 472322

To,
VARSHA PRAVIN HOLE
SARDAR PATEL INSTITUTE OF TECHNOLOGY

Subject: Confirmation of Completion of Internship and Project Report Submission.

Dear Candidate,
This is to formally certify that Varsha Pravin Hole has completed a four-week internship with India Space Academy, serving as a "Remote Sensing and GIS Intern" during our Summer Training Program held from July 15, 2025, to August 16, 2025. During this period, the candidate actively participated in structured training sessions and project-based work focused on Remote Sensing and Geographic Information Systems (GIS).

The candidate demonstrated strong analytical acumen, coding proficiency, and effective problem-solving abilities while contributing to the assigned project(s). We sincerely appreciate the dedication, diligence, and meaningful contributions exhibited throughout the internship tenure.

We wish you all the best in your future endeavors and career pursuits. We are confident that the skills and experience you gained here will serve you well.

The candidate completed and submitted the report of the following project (s):

- **Land Use Land Cover Classification: This project employed supervised classification methods on multi-spectral satellite imagery to generate detailed LULC maps. Land cover classes such as agriculture, built-up, water, and fore**

PROF. B. N. CHAUDHARI
Principal

Dr. Renuka Pawar, Dr. Jignesh Sisodia, and Mr. Abhijeet Salunke received the Best Question Paper Award (Academic Year 2024–25) from SPIT IQAC for excellence in designing a well-structured question paper for the course Computer Communication and Networks.

Prof. Renuka Pawar- I am honoured to share that I received the Award in Recognition of Academic Excellence, Invaluable Contributions, and Dedicated Service on 20 November 2025.

Internship Completion Letter

Admission No.- 136829

To,
DR.RENUKA SABHEBRAO PAWAR
SARDAR PATEL INSTITUTE OF TECHNOLOGY

Subject: Confirmation of Completion of Internship and Project Report Submission.

Dear Candidate,
This is to formally certify that Dr.Renuka Sabhebrao Pawar has completed a four-week internship with India Space Academy, serving as a "Remote Sensing and GIS Intern" during our Summer Training Program held from July 15, 2025, to August 16, 2025. During this period, the candidate actively participated in structured training sessions and project-based work focused on Remote Sensing and Geographic Information Systems (GIS).

The candidate demonstrated strong analytical acumen, coding proficiency, and effective problem-solving abilities while contributing to the assigned project(s). We sincerely appreciate the dedication, diligence, and meaningful contributions exhibited throughout the internship tenure.

We wish you all the best in your future endeavors and career pursuits. We are confident that the skills and experience you gained here will serve you well.

The candidate completed and submitted the report of the following project (s):

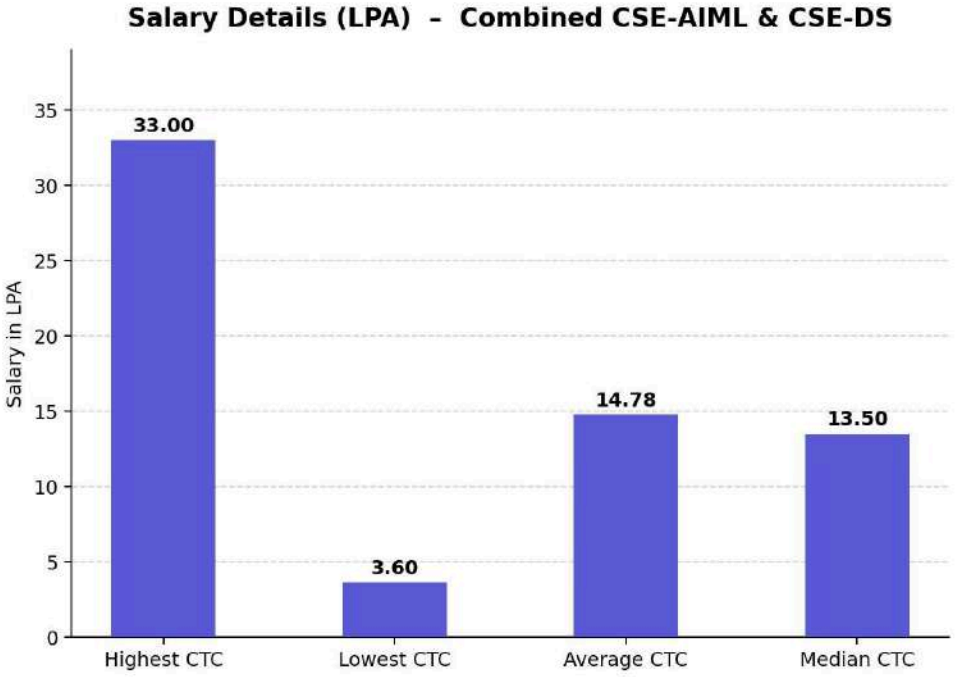

- **Vegetation Health Mapping using NDVI: The project applied NDVI to satellite imagery for quantifying vegetation condition and distribution patterns. The results distinguished healthy vegetation from degraded or stressed areas,**

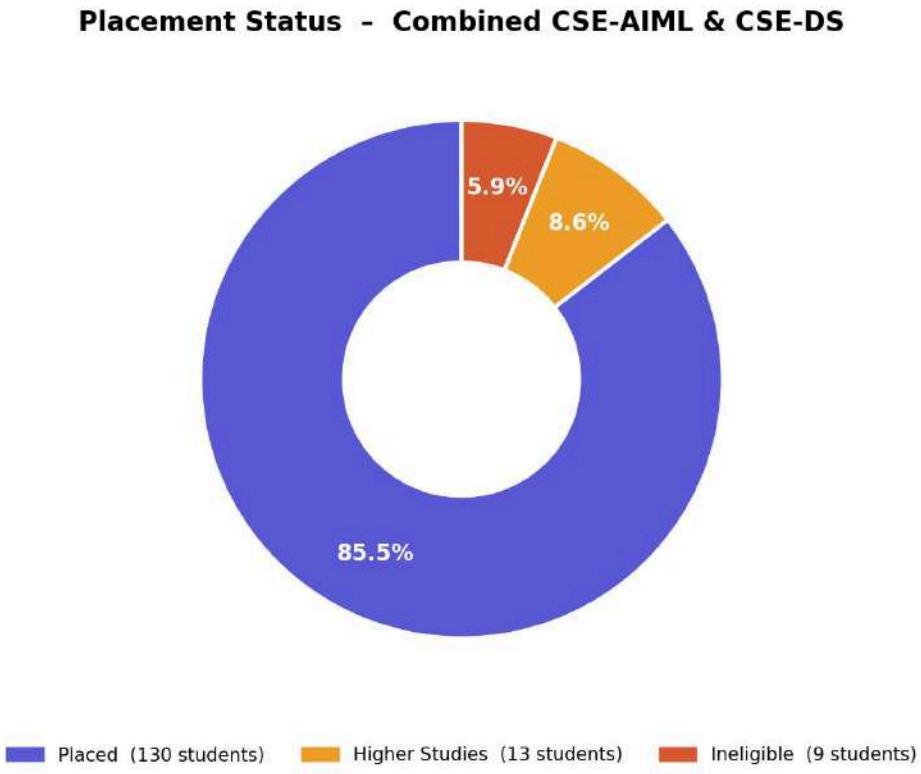

Best regards,

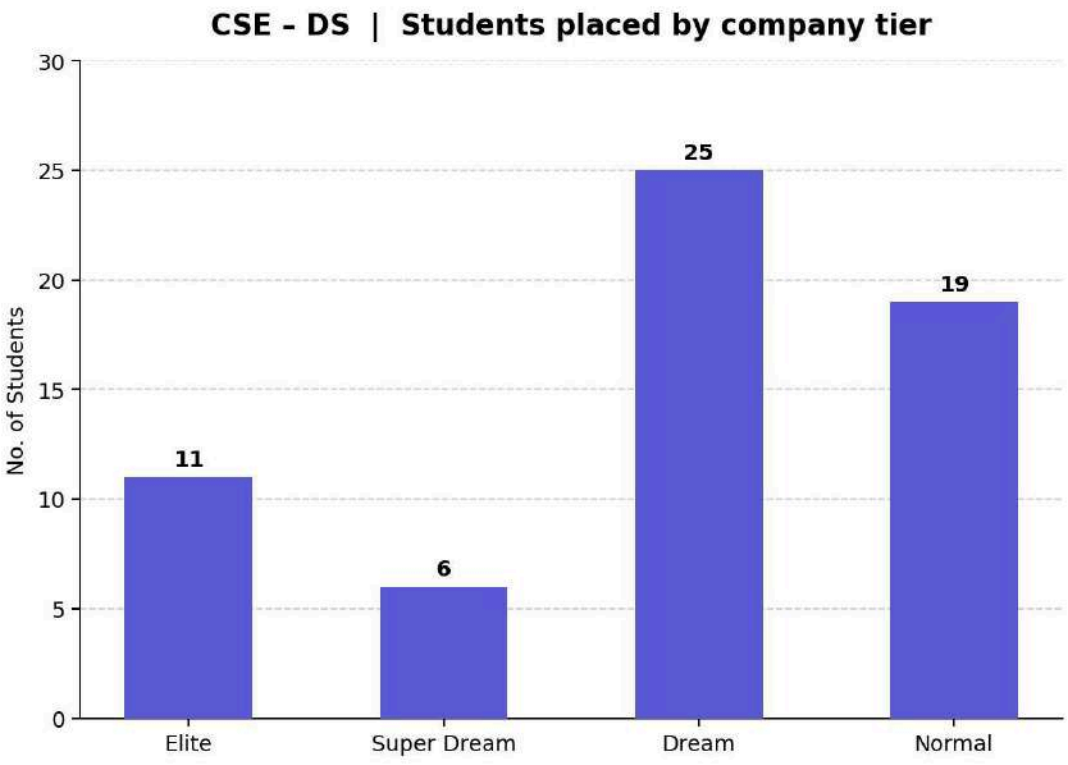

निदेशक/Director

Student Achievements

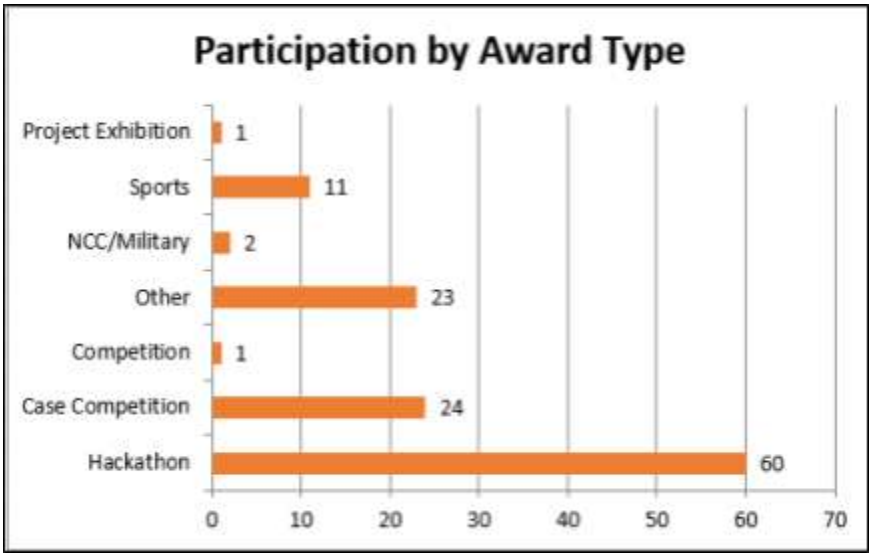

1. Executive Summary

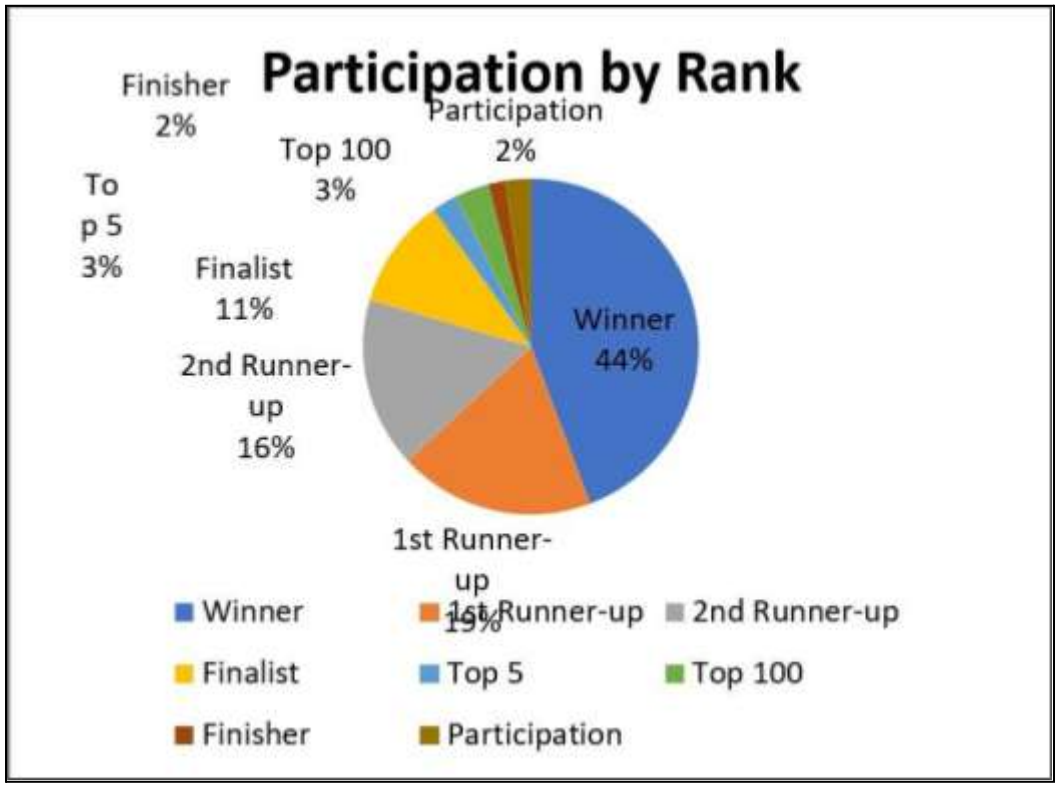

This report presents a competition-wise analysis of all students present in the final clean data workbook for academic year **2025-2026**. The analysis is based entirely on the latest cleaned workbook and is reported at event level where needed so team prizes are not double-counted across repeated student rows.

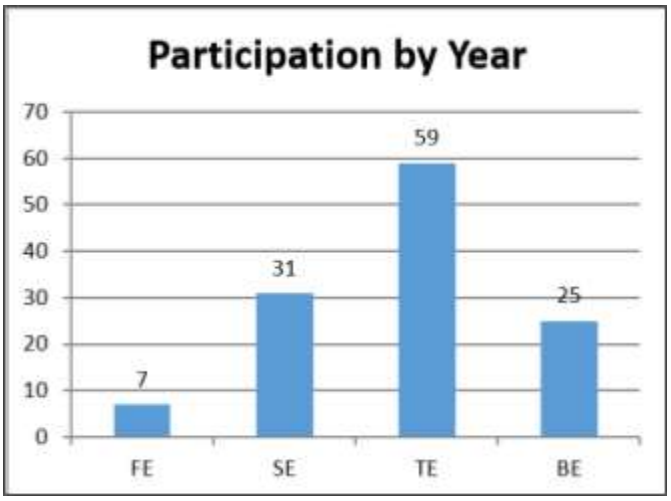

Competition Category	Distinct Events	Student Entries	Prize Money
Hackathon	18	60	₹616,000
Case Competition	9	24	₹45,000
Competition	1	1	-
Other	9	23	₹48,000
NCC/Military	2	2	-
Sports	3	11	-
Project Exhibition	1	1	-

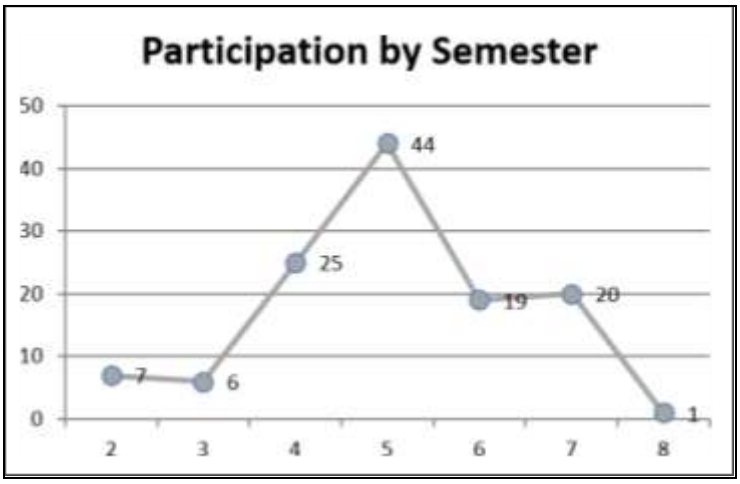

Total unique organising institutions: **36** | Total distinct competition entries: **43** | Unique students: **84** | Student participation entries: **122** | Departments represented: **5**

DEAR ZINDAGI

Romantic Comedy

★★★★★

The story is about Kaira who's a cinematography . A coming-age problem presented in a very special way. The story moves ahead because of something related with Kaira's past. In short, the movie tells us about how to overcome our biggest enemy... fear. Kaira buries her childhood fear, of someone leaving her, deep inside her heart. This fear ruins her present life.

But she makes her comeback when she meets Jehangir Khan in Goa, who's a psychiatrist... but not of that kind who just prescribes medicine, but the one who actually listens. He tranforms a frustrated& lost girl into a lady with ambition, filled with joy and happiness and thus, her new life begins.

"Don't let your past blackmail your present to ruin your beautiful future!!!"

If you feel sad, share it with someone who you actually trust, kyuki "agar tum khulke ro nahi sakte toh khulke hasoge kaise? "

By Janhavi Tayade

Time for Yourself

Name: Janhavi K. Tayade
Class: TE CSE B

"Time for yourself" simply means to take some time off from your hectic schedule and do self-exploration. In today's world, we are so lost in seeking perfection to please our parents, friends, teachers, and many more people to whom we are unknown. But in this process, we forget to think, "Are we able to please ourselves?"

We always give our best to withstand our surroundings. We try to adapt ourselves to society so that we are not left behind. If we deeply analyze what's actually happening, we are constantly changing ourselves as per the requirements of other people. We are unknowingly losing our true selves. We are letting others manipulate us.

We are so busy doing our tasks that we are unable to take out even 1 second of rest from our lives. Even if we manage to take out that 1 second, instead of enjoying that 1 second we will think about the stuff we will be doing after that 1 second. In this way, we keep on losing such 1 seconds and in the end, we regret not enjoying the time that we had earlier. We keep on sacrificing the things we like, to achieve our goals and once that goal is achieved we set up another goal and try to achieve that and again we sacrifice our refreshments and this trap continues. We promise ourselves that once this goal is achieved, "I'll be satisfied with my life.", but the truth is that we are never ever satisfied. It's this human tendency that we keep on upgrading our bucket list to get something high. But why don't we try to be happy with what we possess right now?

I'm not telling you not to dream big, but not to lose your true self in this process. Let's take a very known example of a student aspiring to go to IIT. That student goes to the education hub of India - Kota and puts all his/her efforts and brain just to achieve that 1 seat in the renowned institute. Such students forget their external life, they forget playing and spending time with friends in fact, friends become competitors. What they know is to study 24*7 managing both schoolwork and coaching. If he/she gets that seat, then that day becomes the happiest one, but what if the scene is opposite? After this, the student thinks that what's the use of sacrificing everything if he/she is unable to achieve the thing for which he/she worked day and night? Here, the thing is not of course to not focus on studies, but to make sacrifices to a very limited extent so that your regrets don't consume you in your future. Even if you are not able to get IIT, you'll still cherish the memories you made in those 2 years.

Take out some time from studies and work, take your eyes off from laptop and mobile screens and chat with your childhood friends, remember the old memories that will make you laugh, remove your album which is lying in some corner of your home, spend some time with your elders, let the rhythm of music consume you, go out for a walk with your loved ones, plan a vacation not just to post stories on Instagram but to enjoy the moment, watch the sunset near the beach, write something you like, play your guitar or piano.

Do whatever reveals the "true" you.

Your life is a one-time opportunity so live it to the fullest instead of postponing the best moments of your life which may never come again.

AI-Driven Space Habitats: The Future of Human Life Beyond Low Earth Orbit

Name: Sahil Vishwasrao
Class: FE CSE

Introduction:

Since the launch of Sputnikÿ-1 in 1957, space travel has evolved dramatically, marked by milestones such as Gagarin's flight and NASA's Apollo missions. Human exploration has extended beyond Low Earth Orbit to the Moon and Mars, despite ongoing challenges in communication and the necessity for Artificial Intelligence (AI) and Machine Learning (ML) in developing autonomous systems. So, what is AI-ML? AI refers to machines' ability to perform tasks that require human-like intelligence, while ML, a subset of AI, focuses on creating systems that analyze past data, recognize patterns, and enhance their performance through experience.

Use of A.I. and M.L. in space habitation:

In several projects by NASA, A.I. is viewed as the future of space habitats which will operate autonomously without any constant Earth supervision. Thus, to save the communication time from earth to orbit, A.I-M.L. has been integrated in several layers of space habitation

Some layers in which A.I. and M.L. are introduced are:-

• Life Support:

A.I. is used to manage the environmental controls, manage the crew health and perform required measures by autonomously adjusting the O2 and CO2 levels, keep a track of crew vitals as well as detecting the faults in the systems. Thus they are reliable and useful for long term use in space.

• Robotics and Autonomous Maintenance:

Artificial Intelligence and Machine learning can operate automated robots for satellite maintenance and repairing. This helps reduce risk to human life caused by solar radiations or other factors of space. Various papers show that AI models can identify faults in spacecraft or bio-regenerative systems before humans notice them. Scientific experiment automation:

A.I. automates scientific instruments and other apparatus based on sensor feedback. Example: Astrobee robots on ISS, which use computer vision and machine learning to routine tasks on the space station and its systems.

• Radiation monitoring and shielding:

AI-ML models analyze the data by radiation sensor and calculate as well as control the radiation protection systems of the space station. It can simulate different material configurations and find the best fit for anti-radiation use.

Conclusion:

A.I. and machine learning are crucial for future space habitats, making systems autonomous and efficient, minimizing human effort and Earth communication reliance and carrying out complex

tasks in no time saving time and lives of the astronauts. As humanity explores the Moon, Mars, and beyond, these technologies are vital

for sustainable, safe long-duration space habitation.

Acknowledgements:
I sincerely thank and appreciate the researchers, scientists, and organizations whose work on Artificial Intelligence, Machine Learning, and space habitation contributed to this study, especially NASA for providing accessible knowledge and data.

Poetry

With dreams in cocoon to live in high,
It broke and kindled a little butterfly.
The colours and wings were fascinations,
In start she cry, in end she cry.

Sanctity of pearly stream, the petals were blessed.
The initial baby cry sounded the best.
But the colours of life were odd in fancy,
And now she knew her tears will never rest.

Even the hued blooms had bitter juice.
In masks of colours she was so confused.
Consumed the tart nectar, she wanted to live.
The kind fly signed with herself a truce.

She quit her survival now wanted to live,
Bumped her soft wings with a tree of olive.
Took a moment and studied cause of such days.
Her dreams were left in cocoon, lost in hay.

~Krishika Jalali

Love's Canopy

— CH —

"How would you spend a life with me? I've nothing,"
he said with teary eyes

"In your loving arms, I'll bask always,
My veins entwined our sanctuary's core.
Tendrils of love, stretch and unfold,
Forming a canopy, our haven to hold.
Together we'll lie, beneath starry skies,
Counting the sparkling jewels,
as love's sweet surprise.
Gawking and beaming, our hearts aglow,
In this haven of love, where we'll forever grow."
she said, reading it from her diary

He smiled, kissed her petals warmly,

sealing her as his own.

~ *Onkar Allewar*
TE CSE

I Chose Me

Name: Apurva Khangal
Class: TE CSE

you broke me in ways i can't forget,
in words that linger, in quiet regret.
you laughed when i hurt, brushed it aside,
like the cracks in my heart were easy to hide.
i tried to explain, i tried to show,
the kind of care we both should know.

you could debug a code, solve the edge case,
but the edges of me? you'd barely face.
i told you my limits, my fears, my pain,
but somehow my words spoke all in vain.

i waited, i hoped, i gave my all,
built bridges while you let them fall.
friends saw the hurt i tried to hide,
but i'd smile, i'd nod which broke me inside.

it wasn't about how less we met,
it was the feeling of being easy to forget.
because love isn't code you simply complete,
it's effort, intention, making someone feel seen.

so one day, quietly, softly, i chose
not the love that left my heart froze,
but my peace, my voice, my space,
the part of me i had stopped to embrace.

i've learned love isn't a task to complete,
it's not a line of code, it's not a feat.
it's patience, it's presence, it's feeling seen,
not ignoring the cracks where the light had been.

i am not the girl who waits alone,
i am the woman who's grown.
so i chose myself, my heart, my mind,
the part i lost, the girl i'd find.

you were a chapter, not the end,
a lesson, a scar, a place to mend.
i loved, i hoped, i tried, i cried,
and in leaving, i healed, and i've tried.

and every word i write, every line i send,
is a promise to myself, a heart to defend.
i am my own safe place, my own bright light,
i am my courage, my own quiet might.

so yes, i move, yes, i smile,
not because i forgot, not after a while.
but because i know what i deserve,
and finally, finally, i have my nerve.

i chose me,
i really chose me,
and that choice blooms
in ways you'll never see!!

Between two roses

Name: Shravani Mane
Class: SY CSE

Inside my book slept two roses
one dried gently, carrying the fragrance of days that once loved me,
the other surrendered to fungus and silence, unable to survive the passing of time.
And somewhere between those fragile petals,

I understood
some memories soften into poetry,
while others decay into wounds we no longer speak of.
Yet both once bloomed with the same beauty,
just like people
some stay in our hearts as warmth,
and some leave behind only the ache of their absence.
For no matter how tightly we press them between our pages,
not every flower we hold close
is meant to remain with us forever.

-Shrawa

Ujle Savere ka Andhera

Name: Rudra Koli
Class: SY CSE

Ek ujla savera tha,
Maana woh behad pyaara tha.
Naye chizo ki shuruat thi,
Naye aashiyaano ki chahat thi.

Magar jab suraj sar par chadha,
Toh ek chehra jaana pechana sa laga.
Jiski chahat hua karti thi kabhi,
Woh dard phir se jawaan sa laga.

Socha tha waqt mita dega sab kuch,
Par woh toh mujhe tere aur paas laane laga.
Har nayi mehfil mei tujhko dhundha,
Par koi chehra tujhsa kabhi na laga.

Mai nikla tha tujhe bhulalne magar,
Har aaine mei tera chehra nikharne laga.
Aur jo zakhm duniya se chupa rakha tha,
Woh phir teri yaadon se ubharne laga.

Phir shaam ne dheere se daaman faila diya,
Mere andar ke sukoon ko tanha kar diya.
Suraj toh dhal Gaya waqt ke sath magar,
Tere khayal ne mujhe phir se barbaad kar diya.

Mere liye tum kon

Name:Rehan Ansari
Class: TY CSE

Mere har shayri ka aagaz ho tum
Mere har muskurahat ka raaz hi tum
Mere liye sabse khaas hi tum
Mere har sawal ka jawab ho tum
Mere har iktalafat shrurwat ho tum

Tumhare bin aakhe mere nabina jaise
Aur tumhare bin Ishq mera adhura sa hai

Tum he mere hasi ka sabhak
Aur mere aasou ke wajah bhi tum
Mere haya ka aagaz ho tum
Mere muhabbat ka anjam ho tum
Mere har ghuzr the din ka lamha ho tum
Mere har raat ka Chand ho tum

Mere Dil ke liye jazbaton ka Toofan
Aur zehen ke liye Ishq ke aarzu ho tum

Sach kahu to muhabbat ho tum

كَفَّارَة

Name:Rehan Ansari
Class: TY CSE

Mujhe har chiz thi manzur bazahe Ishq na hota Usse paane ke tamana na hote usse khone ka khof na hota Usse sajdo me mangne ke tadap na hote usse kisi gair ke saath chale jaane ka dar na hota Kafara adda kar leta agar gunah itna shaded itna bada na hota

Closing Remarks

As we bring this edition to a close, we take a moment to reflect on the incredible journey that has defined the academic year 2025-26. From the inspiring guidance of our HOD, Dr. Dhananjay Kalbande and Associate HOD Dr. Renuka Pawar, and the unwavering support of our Faculty Advisor, to the relentless enthusiasm and creativity of our talented team members, every voice and effort has shaped a year of meaningful progress.

This year has been marked by a vibrant array of events and initiatives that have ignited curiosity and collaboration. From the dynamic technical and cultural events, and the enriching workshops on AI/ML, Blockchain, IoT, and Quantum Computing, we have pushed the boundaries of knowledge and innovation. These experiences have not only sharpened our technical skills but also strengthened the bonds within our academic community.

We celebrate the outstanding accomplishments of our faculty members, from their NPTEL certifications and research publications to their leadership in FDPs and patent filings. Equally inspiring are the triumphs of our students—whether in national competitions, hackathons, cultural events, or technical projects—each milestone reflects their hard work, passion, and relentless pursuit of excellence.

With deep gratitude, we bid farewell to this remarkable year, carrying forward its lessons and memories as we step into new challenges and opportunities. Here's to another year of innovation, collaboration, and success!
Onwards and upwards!

CSE Department get together and event - 8th April 2026
